

PRATER "SANITARY" ROTARY SIFTER

The new Prater "S" series Rota-Sieves™ are manufactured to meet all USDA, 3A and CGMP standards for dairy, food, and pharmaceutical dry products. This high capacity sifter is designed for ease of cleaning and maintenance. Screen removal can be accomplished without tools faster than any other sifter built today. Its unique design allows quick removal of the screen frame assembly without the shaft having to move which makes it very easy to inspect or replace.

FEATURES INCLUDE:

- Sanitary stainless steel construction.
- Hinged swing-out screen removal door.
- Ultra high capacity per area of screen cloth.
- Totally enclosed dust free operation.
- Outboard bearings and air purged PTFE seals.
